

UNIVERSITY OF VIRGINIA  
SCHOOL OF GEOLOGY

JOSEPH K. ROBERTS, PROFESSOR  
GENERAL GEOLOGY AND PALEONTOLOGY

February 12th 1940

UNIVERSITY STATION, Box 1471  
CHARLOTTESVILLE, VIRGINIA

Dr. H. B. Stenzel,  
Bureau of Economic Geology,  
University of Texas,  
Austin.

My dear Dr. Stenzel:

Your letter of February 9th received this morning, and I am grateful to you for sending me your four reprints. After going over a collection of pamphlets I find a copy of my paper on *Terebratula Marylandica*. At the time of publication, this did not meet with much favor with Drs. L. W. Stephenson and C. Wythe Cooke. They claimed it was not *Terebratula Marylandica*, a new species, but *T. Harlani*, and I believe I am right in saying the beds are regarded by them as being in the Tertiary now rather than in the Cretaceous.

I shall appreciate your sending me any of your reprints as they are always helpful in teaching. Thanking you, I am

Sincerely yours,

*Joseph K. Roberts*
