Dear Friend Stenzel

When I arrived home I found on my desk not only your paper on Tertiary nautiloids and Eocene brachiopods, but also the two papers by you and Turner. When I get time to read these, I may want to write you again. Right now I want merely to thank you for them and tell you that the illustrations look fine indeed. Also, I want to tell you how much both John Reede and I appreciated all you did for us while we were in Austin. Truly I had a splendid time there with you and your colleagues

As ever

A. H. Miller
