Dr. H. B. Stenzel
Bureau of Economic Geology
Austin, Texas

Dear Dr. Stenzel:

I am sending this letter to Austin because I thought perhaps you might have left Crockett.

There can be no doubt, of course, that use of the term Paleocene makes the classification of the Eocene more precise. At any rate, if such terminology can be carried further, I should like to place the Hatchetigbee-Bashi fauna in "Pal-middle Eocene".

Mrs. Plummer wrote to object to my classification. I am enclosing a copy of my reply to her, which expresses my reason for placing the Wilcox in "middle Eocene".

I hope you have the Claiborne outcrops well in hand.

With best regards, I am

Very truly yours,

J. B. Garrett
