

Dr. H. B. Stenzel
208 East 55 street,
Austin, Texas

July 1. 1938

Dr. Thos. L. Bailey

Dr. H. B. Stenzel continued the mapping of faults in northeastern Bastrop County. One of the faults has a throw of about 250 feet, bringing the base of Crockett formation near the base of the Weches formation on the two sides of the fault. To the east of this fault the Crockett formation has a slight swing in its outcrop indicating possible closure along the fault. Leasing of land along this fault was recommended by Dr. H. B. Stenzel.
