Dear Henryk:

I have continued to hear pleasant reports about your returning good health, and Wendell has told me that soon you will be returning to work at least on a part-time basis. This is good news indeed.

Recently I received a copy of your report on the pelecypods from the Stone City beds of Texas. This is my idea of a well-rounded geological report. By that I mean it is well written, well documented, and beautifully illustrated. I am very happy to have a copy of my own.

With best wishes,

Sincerely yours,

Harry S. Ladd
