Mr. Henry D. McCallum  
Humble Oil & Refining Co.  
Box 1271  
Corpus Christi, Texas

Dear Mr. McCallum:

One of the University of Texas students wishes to map an area in the Tertiary part of the Gulf Coastal Plain for his master's thesis. He has already done some mapping of the Jackson group, so we thought it would be a fine thing if he could map an area approximately 5x5 miles in size in Fayette County on the Jackson group. Before definitely selecting the area, I would appreciate it if you could outline a likely portion on the accompanying map. This area should be approximately 5x5 miles in size, cover the Jackson group from bottom to top, be as free as possible from terrace gravels, and preferably have good exposures. The student will be able to do this field work during the next academic year by going out from Austin Saturdays and Sundays. Needless to say, I would appreciate your help in this matter greatly.

With best regards,

Sincerely yours,

H. B. Stensel  
Geologist
