Mr. E. W. Scott
Union Oil Company of California
240 Ricou-Brewster Building
Shreveport, Louisiana

Dear Mr. Scott:

I shall be glad to discuss the Claiborne stratigraphy along the Sabine River with you. I have done some work there recently and think that the section is fairly clear, although rather unusual. My present schedule includes the Southeastern Geological Society Field trip in Florida, December 5 and 6. Should you by any chance make that trip too, we probably could get together in Tallahassee. I shall keep you posted whenever I can come to Henderson.

Very truly yours,

H. B. STENZEL
Geologist
