

15 Nov. 44

My dear Stenzel:

I've just been reading your "Yegua Problem" in Tex 3945 & re-reading parts of "Leon County". I commend highly the work you are doing & compliment you on both the stratigraphic & paleontologic contributions you are getting out. I'm particularly interested in & working on analysis of various stratig. principles & would like to ask if you have separates of the two papers mentioned above that I could have here in Washington? We have them in Lawrence of course, but bound up in volumes.

Best personal regards

Sincerely

Ray Moore
