Dear Dr. Stenzel -

It is somewhat difficult to realize that we have already been here 10 months now nearly. The work is still quite interesting and challenging. Now that I have a microscope and other equipment installed at home, I can work regularly in the evenings on my own projects and intend to publish several papers on Tertiary pelagics in the near future. 'Oil man's rheumatism' is not one of my fears, though it appears to be an occupational disease among some so called professional paleontologists here. However, I think it all goes back to the character of one's original training and the individual himself. One is either research oriented or one is not. We leave on vacation on November 9th and shall be in Czechoslovakia several days with Pokorný, Cípek and Scheibnerova - Warsaw with Pzaryski's & then 10 days in Russia. We plan to spend our first 3 days in milan shopping for books & miscellaneous gifts for our Russian friends. If you wish me to get something for Naidin - such as a wind-breaker, field jacket type of thing, I should be happy to oblige. ~~If~~ I imagine \$20-30 would be a fair sum to return with (this would be my estimate in Sweden & Italy is not more expensive). Naidin wrote recently

that all is well in Moscow and that
he looks forward to seeing us again.
After 10 months in Tripli the Bolshoi &
Moscow Conservatory are going to be tasty
little delicacies for the 'Lilyans'.

I read of Rainey's 'early retirement'. Seems a
bit too early doesn't it? - or will he really
be happier now than he is 'independent'?

I hope you are well. Here in Lilya we
have had a hot but bearable summer &
are mid-way into a lovely, cool & unusually
rainy autumn.

In late-September I was in Vienna for
week at the 8th European Microspalms Colloquium -
Established a precedent for the company by
being sent there since it had not been done
(nor attempted) before. But a parallel in
pointing out the necessity of personal contacts, etc.
at international symposia. It was a very
beneficial meeting & we collected some lovely
material from D'Arignys Vienna Basin
localities + Palerone from Salzburg area.

Best regards

Sincerely,

Bill Berggren
