

AGRICULTURAL AND MECHANICAL COLLEGE OF TEXAS

COLLEGE STATION, TEXAS

DEPARTMENT OF GEOLOGY

Box 306,
McAllen, Texas
August 12, 1933

Dear Stenzel:

I have your letter from Austin with its disturbing news about Mueller. It would have been better if you had consulted me before recommending him for a job. Mueller has accepted an assistantship in the department for next year and if he quits I will probably lose the position.

If you go back to Bryan you can get a key to the building from Phil Norton. One thing I am going to do this year is catalogue all specimens in the department. If you are working on collections you might start that if you have nothing else to do. Paleontology numbers will be from 7500 up, Rocks and minerals 1-7500. All numbers where possible are to be under ink on white background.

I think Mueller should take the job if offered but it will be too bad to disrupt departmental plans after they are all settled. However, I will talk to you about it when I return I will be in on the 31st.

Very truly
John T. Lewis
