...What is even more distressing is that ...I have already told you this, we have often said so ...the methods of execution used by the *Inyenzi-Inkotanyi* ...they kill in a cruel manner ...they mutilate the body ...and remove certain organs such as the heart, the liver and the stomach. This is what I was telling you yesterday, that the *Inyenzi-Inkotanyi* could be eating human flesh ...no, there is no doubt about that anyway, since ...what do they do with all the organs they remove from the bodies? They do eat human flesh ...the *Inyenzi-Inkotanyi* eat human beings.... so much so that we have little hope of finding any remains.... (Valérie Bemmeriki, RTLM, 14 June 1994).
