18 TO 28 COLLEGE AVENUE (OPPOSITE UNIVERSITY).

HENRY A. WARD, PRESIDENT.

CABLE ADDRESS:
"COSMOS,"
Rochester, N. Y.

Rochester, N. Y., Oct. 12, 1897.

Prof. P. W. Simmons*
University of Texas,
My dear Professor.

Your letter of the 4th inst. came during my absence from home: - hence my delay in replying. How can I know (remember) how the Meg. is mounted at Cornell? I who have mounted (pieces or by proxy) no less than 56 of this sprightly Edentate. So I enclose two photos to you. Please to return me one of them.

I assume that you want it only for some information from it. If you want it to hang up in your study I think that I can find a further one, and will send it to you with pleasure.

How about that slice (end. slice) of ~~rock~~ Iron Meteorite - with surface hwy as large as this page - which lies - face down - in your office with other specimens. What Meteorite is it?

Yours very truly
Henry A. Ward.
