

THE UNIVERSITY OF KANSAS
DEPARTMENT OF GEOLOGY
LAWRENCE

July 30, 1941

Dr. H. B. Stenzel
Crockett
Texas

My dear Dr. Stenzel:

I have just gotten back from a western trip which took me as far as Washington. I find your letter of July 15, supplementing your previous one about teaching work at Kansas. I know of your high ability in research work and general handling of geological matters, also Dr. Sellards high consideration of you, but I must confess that I had overlooked when I first wrote to you, the years of experience in general teaching work that you had had at Texas A. & M.

There is no point in digging into these matters at the present time, so far as the Kansas situation is concerned, because matters had really been settled before receipt of your first letter, although not finally so. Before I left for the West, decision had been made to offer teaching position to Lowell R. Laudon, and he has accepted appointment.

It is a compliment to us that you have been interested in possible connection with our University, and if there is opportunity in future for developments along this line, I shall certainly want to get in touch with you.

With very cordial personal regards, I am

Sincerely,

Raymond C. Moore
