

# Table of Contents

**Preface** ..... v

## **Computer Interfacing for SFF**

**A Flexible File Format for Solid Freeform Fabrication** ..... 1  
*Steven J. Rock and Michael J. Wozny,  
Rensselaer Design Research Center, Rensselaer Polytechnic Institute*

**Inverse Geometry for Stereolithographic Manufacturing** ..... 13  
*Don R. Brown, Venkatesh Subramanyan and Samuel Drake,  
Mechanical Engineering and Computer Science Departments,  
University of Utah*

**Software Testbed for Selective Laser Sintering** ..... 21  
*Richard H. Crawford, Suman Das, and J. J. Beaman,  
Mechanical Engineering Department, The University of Texas at Austin*

**Utilizing Topological Information to Increase  
Scan Vector Generation Efficiency** ..... 28  
*Steven J. Rock and Michael J. Wozny,  
Rensselaer Design Research Center, Rensselaer Polytechnic Institute*

**Solid Freeform Fabrication Laser Tracking Control** ..... 37  
*Ying-Jeng Engin Wu and Joseph J. Beaman,  
Mechanical Engineering Department, The University of Texas at Austin*

## **Polymers**

**A Model for Partial Viscous Sintering** ..... 46  
*Ming-shen M. Sun, J. Christian Nelson, Joseph J. Beaman and Joel W. Barlow,  
Mechanical Engineering Department and Chemical Engineering Department,  
The University of Texas at Austin*

**The Relationship of Process Characteristics of  
Stereolithography to Prototype Dimensions** ..... 56  
*V. Cariapa, S. K. Liang and W. E. Brower, Jr., Department of Mechanical and  
Industrial Engineering, Marquette University*

**Models for the Prediction of the Thermal Conductivities of Powders** ..... 62  
*Samuel X. Xue and Joel W. Barlow,  
Chemical Engineering Department, The University of Texas at Austin*

**Polymeric Powder Material Technology for  
Selective Laser Sintering: The Overall View** ..... 70  
*Biing-Lin Lee, BFGoodrich Company*

**Post-Processing of Selective Laser Sintered Polycarbonate Parts** ..... 78  
*J. C. Nelson, N. K. Vail, M. M. Sun and J. W. Barlow,  
Department of Chemical Engineering and the Mechanical Engineering  
Department, The University of Texas at Austin*

## Modeling of SFF

<b>A Finite Element Model of Multi-Layered Laser Sintered Parts</b> . . . . .	<b>86</b>
<i>E. M. Weissman, BFGoodrich Company and M. B. Hsu, Marc Analysis Research Corporation</i>	
<b>Rapid Prototyping for Foundry Tool Making: Curriculum and Industrial Projects</b> . . . . .	<b>95</b>
<i>Unny Menon and Martin Koch, Industrial Engineering Department, California Polytechnic State University</i>	
<b>A Three Dimensional Model for Selective Laser Sintering</b> . . . . .	<b>102</b>
<i>Ming-shen M. Sun and Joseph J. Beaman, Mechanical Engineering Department, The University of Texas at Austin</i>	

## SFF Techniques

<b>Accurate Rapid Prototyping by the Solid Ground Curing Technology</b> . . . . .	<b>110</b>
<i>Haim Levi, Cubital America, Inc.</i>	
<b>Fast, Precise, Safe Prototypes with FDM</b> . . . . .	<b>115</b>
<i>Presented by Robin Wales and Bill Walters, Stratasys, Inc.</i>	
<b>Laminated Object Manufacturing (LOM): A Simpler Process</b> . . . . .	<b>123</b>
<i>Michael Feygin and Brian Hsieh, Helisys, Inc.</i>	
<b>Selective Laser Sintering as a Rapid Prototyping and Manufacturing Technique</b> . . . . .	<b>131</b>
<i>Kent Nutt, DTM Corporation</i>	
<b>Advances In Stereolithography Accuracy</b> . . . . .	<b>138</b>
<i>Paul F. Jacobs and Jan Richter, 3-D Systems Inc. Presented by Dennis K. Medler, 3D Systems, Inc.</i>	
<b>Fabrication of Prosthetic Sockets by Selective Laser Sintering</b> . . . . .	<b>158</b>
<i>W. E. Rogers<sup>1</sup>, R. H. Crawford<sup>2</sup>, J. J. Beaman<sup>2</sup> and N. E. Walsh<sup>1</sup>, <sup>1</sup>The University of Texas Health Science Center at San Antonio and <sup>2</sup>The University of Texas at Austin</i>	
<b>Design of a High Temperature Workstation for the Selective Laser Sintering Process</b> . . . . .	<b>164</b>
<i>Suman Das, John McWilliams, Benny Wu and J. J. Beaman, Mechanical Engineering Department, The University of Texas at Austin</i>	
<b>The Electrostatic Application of Powder for Selective Laser Sintering</b> . . . . .	<b>171</b>
<i>Lawrence S. Melvin, III and J. J. Beaman, Mechanical Engineering Department, The University of Texas at Austin</i>	

## Ceramics

- A Framework for Thermal Spray Shape Deposition: The MD\* System** . . . . . 178  
*Lee E. Weiss, Fritz B. Prinz and Daniel P. Siewiork, The Robotics Institute  
and The Engineering Design Research Center, Carnegie Mellon University*
- Three Dimensional Printing: Form, Materials, and Performance** . . . . . 187  
*Michael J. Cima and Emanuel M. Sachs, Departments of Materials Science  
and Mechanical Engineering, Massachusetts Institute of Technology*
- Effect of Polymer Coatings as Intermediate Binders on  
Sintering of Ceramic Parts** . . . . . 195  
*N. K. Vail and J. W. Barlow,  
Department of Chemical Engineering, The University of Texas at Austin*
- Microstructural and Mechanical Properties of  $Al_2O_3/P_2O_5$  and  
 $Al_{12}O_3/B_2O_3$  Composites Fabricated by Selective Laser Sintering** . . . . . 205  
*Uday Lakshminarayan and H. L. Marcus,  
Center for Materials Science and Engineering,  
The University of Texas at Austin*

## Metals

- Controlling the Microstructure of Arc Sprayed Shells** . . . . . 213  
*P. S. Fussell, Alcoa Laboratories, H. O. K. Kirchner, Universite Paris-Sud,  
F. B. Prinz, EDRC, Carnegie Mellon University and  
L. E. Weiss, Robotics Institute, Carnegie Mellon University*
- Selective Laser Sintering of Cu-Pb/Sn Solder Powders** . . . . . 236  
*J. A. Manriquez-Frayre and D. L. Bourell,  
Center for Materials Science and Engineering,  
The University of Texas at Austin*
- Selective Laser Sintering of a Copper-PMMA System** . . . . . 245  
*B. Badrinarayan and J. W. Barlow, Department of Chemical Engineering,  
The University of Texas at Austin*
- Selective Laser Sintering to Produce Ni-Sn Intermetallic Parts** . . . . . 251  
*Wendy Weiss and D. L. Bourell, Center for Materials Science  
and Engineering, The University of Texas at Austin*

## Gas Phase

<b>Selective Area Laser Deposition - A Method of Solid Freeform Fabrication . . . . .</b>	<b>259</b>
<i>W. Richards Thissell, Guisheng Zong, James Tompkins, Britton R. Birmingham and H. L. Marcus, Center for Materials Science and Engineering, The University of Texas at Austin</i>	
<b>Processing Problems Associated with Gas Phase Solid Freeform Fabrication Using Pyrolytic Selective Area Laser Deposition . . . . .</b>	<b>271</b>
<i>Guisheng Zong, James Tompkins, W. Richards Thissell, E. Sajot and Harris L. Marcus, Center for Materials Science and Engineering, The University of Texas at Austin</i>	
<b>Moving Boundary Transport Phenomena In Selective Area Laser Deposition Process . . . . .</b>	<b>279</b>
<i>Guisheng Zong and Harris L. Marcus, Center for Materials Science and Engineering, The University of Texas at Austin</i>	
<b>Selective Area Laser Deposition from Acetylene and Methane to Increase Deposition Control . . . . .</b>	<b>288</b>
<i>Britton R. Birmingham, G. Zong, J. V. Tompkins and H. L. Marcus Center for Materials Science and Engineering, The University of Texas at Austin</i>	
<b>Key Word Index . . . . .</b>	<b>295</b>
<b>Author/Attendee List . . . . .</b>	<b>296</b>
