Dr. L. W. Stephenson
U. S. Geological Survey
Washington, D. C.

Dear Dr. Stephenson:

Please accept my thanks for the reprint of your paper "New Upper Cretaceous Ostreidae from the Gulf Region." Needless to say I have read the paper with very much interest.

You might be interested to know that we are excavating a Mosasaur skeleton from the lower Navarro of Onion Creek in Travis County. The skeleton is nearly complete. We have also about 40 vertebrae and 30 ribs at present.

Very sincerely yours,

H. B. Stenzel
Geologist
