

A. I. LEVORSEN
GEOLOGIST
221 WOODWARD BOULEVARD
TULSA, OKLAHOMA

September 16, 1940.

Dr. H. B. Stenzel,
President, Southwestern Geological Society,
University of Texas,
Austin, Texas.

Dear Dr. Stenzel:

Last April, I sent Mr. Hendricks a copy of the preliminary assembly of the tectonic or structure map of the United States, asking that he arrange to have someone in your Society collect all corrections, comments or additions which could be obtained. Returns have been received from some of the societies and we would like to get all of the replies in by November 1st, if possible. Immediately upon receipt, they will be forwarded to Dr. Philip B. King, of the United States Geological Survey, in Washington.

It is not necessary that the map be returned but can be kept for use of the members of your Society.

Sincerely yours,

Chairman, Research Committee
