ROCHESTER, N. Y.

Rochester, N. Y., May 4 1898

Prof. Geo. P. Garrison.

Austria.

Dear Sir.

Last Monday I sent you, Express prepaid, a box containing the San Angelo, - surface polished and etched. Also a little package of 2 or 3 Meteorites which I wish that you would kindly present from me to Prof. Simmonds with my best regards.

I trust that the San Angelo mass will please you. I kept it an intolerable length of time. But, - I could not help it. It was very hard to cut. And the last second cutting, another piece got into the saws ahead of it.

Very truly yours

Henry A. Ward.

I covered San Angelo - the cut surface - with Paraffin, as ~~it~~ it should not rust in travel. If you gently heat and wipe that off the "figures" will show a little better

H. A. W.
