Mr. J. E. McCall
The California Company
P. O. Box 510
Pensacola, Florida

Dear Mr. McCall:

This is to acknowledge the receipt of the core with the ammonite. Although the matrix is very hard, the ammonite will prepare out fairly well, so that identification will be possible. I shall write you as soon as I have finished preparing the fossil.

It would help probably if you would let me know the depth, well name, and location. At any rate the material is important enough to have a permanent record.

Very truly yours,

H. B. Stenzel
