Wehrter Herr Doctor:

It was the intention of the San Angelo Geological Society to furnish, free of cost, two copies of our recent field trip, guide book to the outstanding geological schools of Texas. We have had a change in offices in our society and we can find no record of these books having been sent. The title of our guide book is the "Four Provinces Field Trip, 1956". Needless to say we filled even the bleachers on our most recent field trip and with a good season behind us we are anxious to share our geological lore with the schools of Texas. If you have not received your copies, please advise and Santa Claus will try to get them to you before Christmas. With the spirit of Christmas in my heart,

Affectionately,

J. H. McCarron
